

Sri Lanka Army IT Security Policies

Prepared for: Sri Lanka Army IT Department

Prepared by: Cybersecurity Policy Team

Date: September 2025

Password & Authentication Policy

- Minimum password length: 12 characters.
- Passwords must include uppercase, lowercase, numbers, and special characters.
- Passwords expire every 90 days.
- Multi-Factor Authentication (MFA) is mandatory for admin accounts.

These measures strengthen user authentication and protect against brute-force and credential theft attacks.

Data Classification & Handling Policy

- Documents are classified as: Confidential, Restricted, or Public.
- Confidential data must be encrypted both in storage and transit.
- Sharing classified data via personal devices is prohibited.
- Physical copies of classified documents must be securely locked.

This ensures sensitive information remains secure and unauthorized access is minimized.

Email & Communication Security Policy

- All official communication must be done via Army-issued email accounts.
- Phishing and suspicious emails must be reported immediately via the Incident Portal.
- Sensitive data must not be shared via unsecured platforms such as WhatsApp.

These policies safeguard official communication channels and reduce risks from cyber threats.

Device & Endpoint Security Policy

- All devices must have updated antivirus and firewall enabled.
- USB ports are disabled unless explicitly approved.
- Mobile devices must be secured with a PIN or biometric lock.
- Lost or stolen devices must be reported within 24 hours.

This ensures endpoints remain secure and reduces the attack surface.

Incident Response Policy

- All security incidents must be reported within 2 hours.
- The Incident Response Team will investigate and escalate when required.

- Employees are required to fully cooperate with investigations.

Timely reporting allows for swift containment and recovery from threats.

Remote Access & VPN Policy

- Remote access is only allowed through Army-approved VPNs.
- Public Wi-Fi connections are prohibited unless connected via VPN.
- Idle sessions must automatically log off after 10 minutes.

This reduces risks from unauthorized network access.

Policy Acknowledgement Requirement

- Employees must acknowledge each new or updated policy in the Sentinel app.
- Non-acknowledgment may result in restricted system access.

This ensures all staff are aware of and comply with security policies.
