

Password & Authentication Policy

Requirements

- Minimum password length: 12 characters
- Must include uppercase, lowercase, number, and special character
- Passwords expire every 90 days
- Multi-Factor Authentication (MFA) is mandatory for admin accounts

Rationale

- Strong passwords prevent brute-force attacks
- MFA provides additional security
- Regular password changes minimize risks of stolen credentials

Password & Authentication Policy (continued)

Requirements

- Minimum password length: 12 characters - This requirement is critical to maintaining military-grade security standards and compliance.
- Must include uppercase, lowercase, number, and special character - This requirement is critical to maintaining military-grade security standards and compliance.
- Passwords expire every 90 days - This requirement is critical to maintaining military-grade security standards and compliance.
- Multi-Factor Authentication (MFA) is mandatory for admin accounts - This requirement is critical to maintaining military-grade security standards and compliance.

Rationale

- Strong passwords prevent brute-force attacks - This requirement is critical to maintaining military-grade security standards and compliance.
- MFA provides additional security - This requirement is critical to maintaining military-grade security standards and compliance.
- Regular password changes minimize risks of stolen credentials - This requirement is critical to maintaining military-grade security standards and compliance.
